

HX673A Pneumatic Comparator

Product Description

HX673A Pneumatic Comparator consists of hand pump, lead screw, reverse valve, relieve valve & output interface. It features high sealed performance, stable pressure generating and simple operation. It is suitable in the laboratory and fieldwork. It could provide the pressure for calibrating pressure (differential pressure) transmitters, precision pressure gauges, general pressure gauges and other pressure instruments.

Functions

HX673A Pneumatic Comparator provides pressure for calibrating pressure (different pressure) transmitters, precision pressure gauges, general pressure gauges and other pressure instruments. It can be extensively used in power, chemical, petrol, metallurgy, metering, military industry etc.

Characteristics

- Stainless steel, hermetic technology in the military industry.
- Stable generating pressure, convenient maintenance, easy operation.
- No external pipeline, avoid of the outer environment changing influence.
- High pressure resolution 10~300Pa.

Technical Specification

Pressure range	(-0.98~ 60) bar
Stability	0.05% F.S
Working media	air
Output interface	M20×1.5 Female
Dimensions(L×W×H)	270mm×210mm×170mm
Weight	4.5Kg
