

## HX675 Hydraulic Comparator

### Product Description

HX675 Hydraulic Comparator is made of hand pump, lead screw, relieve valve, shut-off valve, booster valve, oil tank and output interface. It provides required pressure with the whole system by hand pump and use the fine adjustment valve .it is easy to operate and labor-saving according to the hydraulic drive principle that big plunger pushes the small one.

### Functions

HX675 Hydraulic Comparator provides pressure for calibrating pressure gauges, such as pressure (different pressure) transmitters, precision pressure gauges, general pressure gauges and other pressure instruments. It can be widely used in power, chemical, petrol, metallurgy, metering, military industry etc.

### Characteristics

- Stainless steel, hermetic technology in the military industry.
- Fast connection, quick pressurizing and convenient cleaning
- It is used for calibrating all kinds of oil gauges
- It has secondary oil filter& a settler. The waste oil can be filtered by this duplex oil tank.

### Technology Specification

Pressure range	(0~1600) bar, (0~2500)bar
Stability	0.05% F.S
Pressure-transmitting Media	Diisooctyl sebacate
Output Interface	M20×1.5 Female
Overall Dimension(L×W×H)	540mm×480mm×210mm
Weight	24.5Kg
