

## Spray Nozzle (Model: AUTO-PZ)

[www.hkauto.com.cn](http://www.hkauto.com.cn)

Introduction:

IPX3-4 Spray Nozzle is a hand-held test device to verify protection against spraying and splashing water. The water pressure can be adjusted using the flow control knob on the device to give the required flow rate. The pressure can be seen on the gauge which is conveniently positioned by the nozzle. The spray pattern of the nozzle is made to the specifications of IEC 60529. A move-able shield can be put down over a portion of the nozzle for IPX3 or moved out of the spray pattern for IPX4.

Pressure Gauge	0 - 1.6 bar
Number of Holes	121
Diameter of Nozzle Holes	0.5
Material	Spray nozzle make of brass
Conforms To	IEC60529, IEC60598-1, IEC 60335-1, IEC60745-1

Include:

- Pressure gauge;
- Movable shield with counterweight;
- Ball valve for water flow regulation;
- Hose connector.
